PROFILE

Results-driven Senior Mobile Developer with over 10 years of experience building high-performance Flutter and Android applications. Expert in Dart and Kotlin, with extensive use of state-management (Riverpod, Bloc) and Flutter SDK for cross-platform development. Delivered many high-quality apps to Google Play, enhanced user experience via streamlined UI. Skilled in Firebase integration, REST APIs and CI/CD pipelines to ensure robust, scalable releases. Strong collaborator in Agile teams, focused on clean code and customer-centric solutions.

EDUCATION

B.Tech in Electronics & Communication Engineering

Model Engineering College,
Thrakkara (Kerala)

2011 - 2015

WORK EXPERIENCE

Senior Mobile Developer - Android & Flutter

SOCXO Solutions Pvt. Ltd ,Kochi | 2017 - present

- Engineered and maintained scalable mobile applications using Flutter(Dart) and Android (Kotlin), establishing a modular and maintainable architecture for multiple products.
- Designed and delivered high-performance cross-platform apps, ensuring smooth user experience, scalability, and compliance with Google Play policies.
- Owned the full mobile delivery lifecycle, including feature development, debugging, regression fixes, release coordination, and production support.
- Collaborated with product, QA, and client teams across regions to translate requirements into technical solutions and deliver timely releases.
- Optimised app performance through code-level improvements, native integration, and feature enhancements to improve stability, load time, and usability.
- Published multiple Flutter packages on pub.dev, contributing reusable components and utilities to streamline development across projects.

Android Developer

Suyati Technologies Pvt. Ltd,Kochi | 2015 - 2017

- Led regression testing cycles and coordinated with QA to identify and resolve issues, improving application reliability.
- Elicited client requirements and defined technical specifications, ensuring project plans met scope and timelines.
- Optimised application performance via memory and thread tuning, as well as implementing requested feature enhancements.
- Designed and released high-performance Android apps, maintaining strong user ratings and feedback.

KEY PROJECTS

Eunoia: AI Mental Wellness

Developed a Flutter-based mental wellness app featuring an AI chatbot for mood support, personalised recommendations, and emotional guidance. Includes planner functionality for task scheduling with reminders, a journaling system for daily reflections, and mood tracking with history and insights to help users monitor and improve their mental well-being.

Socxly: Smart URL Shortener

Created a feature-rich Flutter app for branded short links with CTA banners, social share cards, QR codes and file sharing, integrating analytics to track link performance and user engagement.

Speed Test | HighSpeedInternet

Built a mobile app to test Wi-Fi/Cellular (4G/5G) speeds with real-time metrics (download/upload/ping), video streaming quality, result history, ISP reviews, and performance tracking.

Socxo

Developed an app enabling businesses to boost brand visibility through employee and customer advocacy, with features for content sharing, personal branding, influencer marketing, and measurable engagement analytics.

CERTIFICATIONS

Google Play Store Listing

Google Play Academy

The Google Play Store Listing is a performance-based exam to measure adherence to best practices on creating a Google Play store listing, tell their app or game's story with their store listing assets, and how to market to a global audience. This certificate corresponds to the skills that a mobile app marketer is expected to have to market their app or game on Google Play.
